My interests are mobile application development,UI design, cybersecurity, web design and augmented reality applications. I enjoy developing mobile applications because you can see the result of the code you wrote instantly. My biggest goal is to feel that my contribution to technology is valuable.I have a character who is eager to learn, stress proof, and has strong communication skills.I find myself successful in being a fixer, immediately understanding people's problems and producing solutions to these problems.

## Work experience

- Internship** Jun 2021 - Jun 2021  
Ekon Informatics, Ankara  
I had a productive internship period where I worked on ethical hacking about cybersecurity.
- Internship** Aug 2020 - Aug 2020  
Mechanical and Chemical Industry Corporation, Ankara  
I had a productive internship period that allowed me to learn JavaScript and SQL, and to gain knowledge about hardware devices.

## Education and Qualifications

- Bachelor In Computer Engineering** Sep 2018 - Jul 2022  
Çankaya University, Ankara  
I have been studying C/C++ since my first year. I took an elective course in Java,mobile application development with Java and cryptology. I also know JavaScript,SQL, .NET, JSON,HTML,CSS and using Linux for network security.  
In my graduation project, I made a mobile shopping application using Flutter, Firebase and Augmented Reality.
- High School** Sep 2014 - Jun 2018  
Private Güney Gelişim Anatolian High School, Mersin  
Top Student Of The School

## Courses

- Android and IOS Apps Development with Flutter from scratch** May 2022 - 2022  
Udemy  
It was a great course from Udemy that I used as a lifetime resource, that explained Flutter from the beginning and helped with my graduation project.
- Google Developer Communities Turkey Flutter Fest** Jan 2022 - Feb 2022  
Google Developer Student Clubs  
It was a productive course that covered Flutter and firebase usage in detail from scratch.

## **Ethical Hacking Course**

Jul 2021 - Jul 2021

Udemy

As an introductory course in Cybersecurity , I got detailed information about Penetration tests and attack types.

## **Introduction to Python Programming**

Feb 2021 - Feb 2021

Global AI Hub

After 5 days and 10 hours of live training, my Python introductory course was completed and I was entitled to receive a certificate.

## **BILMOK**

Feb 2020 - Feb 2020

BILMOK

BILMOK conference was held at Yeditepe University in Istanbul between February 20-23.

As a result of the conferences I received from experts in their fields such as Google and Amazon, I got information about the area of expertise that I had to choose.

## **Codivity**

Nov 2020 - Nov 2020

Ankara University

It is an artificial intelligence, software, entrepreneurship, cybersecurity conference organized by the combination of communities in various universities. As a result of the speeches made by experts sponsored by companies such as Havelsan and Roketsan, I gained knowledge in the field of artificial intelligence and cybersecurity.
